

UHSAC Project Plan: Mobile Health Outreach Van

1. Project Overview

- **Project Name:** Utopia Homelands Mobile Health Outreach Program
- **Lead Coordinator:** Sarah Jenkins (Operations & Programs Manager)
- **Clinical Lead:** Dr. David Boyle (Clinical Director)
- **Vehicle Spec:** Custom retrofitted IVECO Daily 4x4 Dual Cab (Clinical Configuration)
- **Operational Cycle:** Year-round (subject to wet season road closures)
- **Annual Operational Budget:** \$320,000.00

2. Program Goals and Scope

Utopia homelands consist of 16 dispersed outstations. Many residents lack transport to travel to the central clinic at Soapy Bore, leading to untreated chronic conditions and low primary care access. The Mobile Health Outreach Program delivers a fully equipped "clinic on wheels" directly to outstations.

Objectives:

1. Conduct scheduled weekly clinical outreach visits to all 16 outstations.
2. Complete 2,500 clinical presentations annually in outstation communities.
3. Deliver primary medication refills, childhood immunisations, and chronic disease testing.
4. Establish satellite-linked point-of-care diagnostics for immediate testing.

3. Weekly Mobile Clinic Rotation Schedule

Day	Homelands Visited	Focus Services
Monday	Arlparra, Camel Camp	Child health checks, school immunisations
Tuesday	Apungalindum (Crows Nest), Mulberry Bore	Aged care home checks, diabetes testing

Day	Homelands Visited	Focus Services
Wednesday	Irrultja, Mosquito Bore	Antenatal checks, chronic disease reviews
Thursday	Soakage Bore, Kurrajong	GP clinics, pharmaceutical dispensing
Friday	Three Bores, Outer Outstations	Emergency follow-ups, equipment maintenance

Note: Schedule varies during November-March (wet season) based on Sandover Highway flooding conditions.

4. Vehicle Specifications & Clinical Capabilities

The outreach vehicle is custom-designed for extreme remote operations:

- **Chassis:** Heavy-duty off-road 4WD chassis with high ground clearance, bullbar, and winch.
- **Clinical Bay:** Air-conditioned, dust-proof consulting room with medical examination couch, refrigerator for vaccine storage, and running water.
- **Point-of-Care Lab:** In-vehicle diagnostics for blood glucose, HbA1c, lipids, and urinalysis.
- **Communications:** Starlink Flat High Performance satellite terminal for real-time electronic health records (Communicare) access and telehealth video links.
- **Power Supply:** 2.4kW solar array + 10kWh lithium battery bank with auto-starting backup generator to run HVAC and vaccine fridge continuously.

5. Annual Operations Budget

Expense Category	Detailed Description	Annual Cost (AUD)
Personnel Salaries	1.0 FTE Nurse Practitioner + 1.0 FTE local Driver/AHP	\$220,000
Vehicle Costs	Diesel fuel, off-road tires, servicing, satellite subscription	\$45,000
Medical Supplies	Point-of-care test kits, clinical consumables, pharmacy restock	\$25,000

Expense Category	Detailed Description	Annual Cost (AUD)
Community Liaison	Outstation council coordinator stipends, translation support	\$15,000
Admin & Insurance	Vehicle insurance, clinical registration, compliance reporting	\$15,000
Total Annual Operations		\$320,000
